Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/511,691	Applicant(s) HANDS ET AL.	
	Examiner SUN JAE Y. LOEWE	Art Unit 1626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 16, 2009 has been entered.

Response to Arguments

2. The remarks filed on November 16, 2009 have been fully considered, however, they are not persuasive in overcoming the outstanding 35 USC 103 rejection. Below are responses to Applicant's remarks.

There is no teaching whatsoever in the '147 patent that the conditions employed for such diverse chemical processes to prepare structurally different compounds should be employed in the context of each of the claimed reaction steps to prepare the subject compound 5-[[2(R)-[1(R)-[3,5-bis(trifluoromethyl)-phenyl]ethoxy]-(S)-(4-fluorophenyl)-4-morpholinyl]-methyl]1,2-dihydro-3H-1,2,4-triazol-3-one in accordance with the claimed process. One of ordinary skill in the art would have been presented with a vast number of potential options because the '147 patent would have not given any indication regarding which parameters were critical, nor which direction among the many possible choices would have been successful.

The prior art teaches the preparation of products which are within the scope of the instant claims. Further, the reference teaches various reactions which lead to these products. See further details in the office action dated June 19, 2009. Therefore, it is within the technical grasp of the skilled chemist to practice the instant invention. The motivation, as previously stated, is to utilize different reactions with expectation of success.

The instant invention utilizes much less organic solvent and thus results in less organic waste.

The instant invention teaches a process which has less purification steps.

The instant invention teaches a process that gives the product in a higher yield.

Applicant's remarks are noted, however, it is within the level of skill to vary parameters such as volume of solvent used, alternate purification. Applicant is invited to provide a declaration showing unexpected results in the yield of product.
